Friday, April 22, 2022 – *Indian River Lagoon 2022 Update*

The Indian River Lagoon has had a rough decade that included intense and widespread algal blooms, loss of seagrass, and manatee mortalities. Join us for presentations that examine the state of the lagoon and how it got there, what is being done to restore the health of the system, and options for augmenting those efforts. Our panelists are leaders in IRL management efforts. After the presentations, attendees will have an opportunity to ask questions of the presenters.

8:30 - 9:00 a.m. Registration Check In and Coffee & Tea

9:00 a.m. – 12:00 noon

Welcome

M. Dennis Hanisak, FAU Harbor Branch
