6. Provide a brief narrative (no more than 150 words) of other deliverables or significant findings for the project that are not specific to a single objective (e.g., manuscripts, presentations, graduate students, leveraging SLP for external funds).

In May 2016, the FAU-HBOI Marine Mammal Rescue Team welcomed our new full time clinical veterinarian Annie Page-Karjian DVM, PhD to the team.

7. Brief narrative (no more than 150 words) of unexpected issues or project changes, including those that need review and approval (e.g., budget changes that are more than 25% in a category, additional study, no-cost extension).

The FAU-HBOI marine mammal rescue team is waiting for an inspection, by NMFS, United States Department of Agriculture (USDA) and the FAU IACUC team, of the FAU-HBOI marine mammal pool prior to being approved to rehabilitate stranded cetaceans again. The tentative date for the NMFS and USDA inspection is August 2016, followed by the IACUC team afterwards. It is the marine mammal rescue teams hope to begin rehabilitating cetaceans soon after completing and passing all inspections.
